## **DETAILED ACTION**

### ***Status of Application: Claims and Amendments***

Applicant is notified that the amendments put forth on 7/26/2006, have been entered in full.

### ***Response to Amendment***

Applicant is notified that any outstanding objection or rejection that is not expressly maintained in this Office action has been withdrawn in view of Applicant's amendments.

### **New Rejections:**

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 34 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "said nucleic acid sequence" lacks antecedent basis in the claim and in the parent claims. Thus, the artisan would not know which nucleic acid sequence is the "said nucleic acid sequence".

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1649

Claim 39 is rejected under 35 U.S.C. 102(b) as being anticipated by Sugasawa-T et al., Agents Actions 37(232-237)1992.

Sugasawa-T et al. disclose a method for assaying a substance, e.g. BRL-35135, for agonist or antagonist activity towards the isolated by polypeptide of SEQ ID NO: 1 and 14 comprising placing the substance in contact with tissue membranes comprising the polypeptide, e.g. eosinophils, and measuring the effect of the substance on eosinophil chemotaxis, see the Abstract and Materials and Methods.

***Allowable Subject Matter***

Claims 23, 25, 26, 29, 33, 35-37, 40-42, 45 and 46 allowed.

***Conclusion***
